The Pest Control People

PRE-ENGAGEMENT INSPECTION AGREEMENT STANDARD TIMBER PEST REPORT

PLEASE READ THESE INSTRUCTIONS CAREFULLY BEFORE COMPLETING THIS FORM

This form is to be completed by the Client. **Special attention should be given to the Terms and Conditions set out in Clause A.1.** Use block letters or [X] where appropriate. Complete all relevant sections: non-completion may delay response.

SERVICE REQUESTED BY CLIENT

As requested by the Client, the inspection carried out by the Timber Pest Detection Consultant ("the Consultant") is a "Pre-Purchase Standard Timber Pest Report".

The purpose of the inspection is to assist the Client to identify and understand any Timber Pest issues observed at the time of inspection. The Report only deals with the detection or non detection of Timber Pest Attack and Conditions Conducive to Timber Pest Attack discernable at the time of inspection. The inspection will be limited to the Readily Accessible Areas of the Building & Site and is to be based on a visual examination of surface work (excluding furniture and stored items), and the carrying out of Tests. Unless noted in "Special Conditions or Instructions" below, the building being inspected is to be compared with a similar building. To the Consultant's knowledge the similar building used for comparison was constructed in accordance with generally accepted timber pest management practices and has since been maintained during all its life not to attract or support timber pest infestation.

SPECIAL CONDITIONS OR INSTRUCTIONS

Are there any special conditions or instructions? If "Yes" specify:

SUPPORT DOCUMENTATION

Will the Client be providing any documents (e.g. Certificate of Subterranean Termite Treatment to support this application)?

If "Yes" specify:

CLAUSE A.1 – TERMS AND CONDITIONS

SPECIAL CONDITIONS

1. The Timber Pest Detection Consultant reserves the right to reject any request for inspection at the consultant’s absolute discretion. In this event, any fees, deposit or other monies paid by the client will be refunded.
2. The Timber Pest Detection Consultant shall not be liable for failure to perform any duty or obligation that the consultant may have under this agreement, where such failure has been caused by inclement weather, industrial disturbance, inevitable accident, inability to obtain labour or transportation, or any cause outside the reasonable control of the consultant.

SERVICE

As requested by the Client, the inspection carried out by the Timber Pest Detection Consultant (“the Consultant”) is a “Pre-Purchase Standard Timber Pest Report”.

PURPOSE The purpose of the inspection is to assist the Client to identify and understand any Timber Pest issues observed at the time of inspection.

SCOPE OF INSPECTION The Report only deals with the detection or non detection of Timber Pest Attack and Conditions Conducive to Timber Pest Attack discernable at the time of inspection. The inspection will be limited to the Readily Accessible Areas of the Building & Site and is to be based on a visual examination of surface work (excluding furniture and stored items), and the carrying out of Tests.

ACCEPTANCE CRITERIA Unless noted in “Special Conditions or Instructions”, the building being inspected is to be compared with a similar building. To the Consultant's knowledge the similar building used for comparison was constructed in accordance with generally accepted timber pest management practices and has since been maintained during all its life not to attract or support timber pest infestation.

Unless noted in “Special Conditions or Instructions”, the Report assumes that the existing use of the building will continue.

80-86 BUCKHURST STREET, SOUTH MELBOURNE 3205 TEL (03) 8696 9000 FAX (03) 9682 6395
info@exopest.com.au • www.exopest.com.au

The Report only records the observations and conclusions of the Consultant about the readily observable state of the property at the time of inspection. The Report therefore cannot deal with:

- (a) possible concealment of timber pest attack, including but not limited to, timber pest attack concealed by lack of accessibility, obstructions such as furniture, wall linings and floor coverings, or by applied finishes such as render and paint; and
- (b) undetectable or latent timber pest attack, including but not limited to, timber pest attack that may not be apparent at the time of inspection due to seasonal changes, recent or prevailing weather conditions, and whether or not services have been used some time prior to the inspection being carried out.

These matters outlined above in (a) & (b) are excluded from consideration in the Report.

If the Client has any doubt about the purpose, scope and acceptance criteria on which the Report is to be based please discuss your concerns with the Consultant before ordering the Report.

The Client acknowledges that, unless stated otherwise, the Client as a matter of urgency should implement any recommendation or advice given in the Report.

LIMITATIONS

The Client acknowledges:

1. 'Visual only' inspections are not recommended. The Consultant does not warrant that a 'visual only' inspection completely complies with Australian Standard AS 4349.3 "Inspections of Buildings. Part 3: Timber Pest Inspections", and may be of limited use to the Client. In addition to a visual inspection, AS 4349.3 recognises to better assess timber pest activity and damage requires the consultant to carry out when ever necessary appropriate tests with instruments.
2. The Report does not include the inspection and assessment of matters outside the scope of the requested inspection and report.
3. The inspection only covers the Readily Accessible Areas of the Building and Site. The inspection does not include areas, which were inaccessible, not readily accessible or obstructed at the time of inspection. Obstructions are defined as any condition or physical limitation which inhibits or prevents inspection and may include – but are not limited to – roofing, fixed ceilings, wall linings, floor coverings, fixtures, fittings, furniture, clothes, stored articles/materials, thermal insulation, sarking, pipe/duct work, builder's debris, vegetation, pavements or earth.
4. The detection of drywood termites may be extremely difficult due to the small size of the colonies. No warranty of absence of these termites is given.
5. European House Borer (*Hylotrupes bajulus*) attack is difficult to detect in the early stages of infestation as the galleries of boring larvae rarely break through the affected timber surface. No warranty of absence of these borers is given. Regular inspections including the carrying out of appropriate tests are required to help monitor susceptible timbers.
6. The Report is not a structural damage report. Neither is it a warranty as to the absence of timber pest attack.
7. If the inspection is to be limited to any particular type(s) of timber pest (e.g. termites), then this would be the subject of a Special-Purpose Inspection Report, which is adequately specified.
8. The Report does not cover or deal with environmental risk assessment or biological risks not associated with Timber Pests (e.g. toxic mould) or occupational, health or safety issues. Such advice may be the subject of a Special-Purpose Inspection Report which is adequately specified and must be undertaken by an appropriately qualified inspector. The choice of such inspector is a matter for the Client.
9. The Report is to be produced for the use of the Client named in this Pre-Engagement Inspection Agreement. The Consultant or their firm or company are not liable for any reliance placed on the report by any third party.

EXCLUSIONS

The Client acknowledges:

1. The Report does not deal with any timber pest preventative or treatment measures, or provide costs for the control, rectification or prevention of attack by timber pests. However, this additional information or advice may be the subject of a Timber Pest Management Proposal, which is adequately specified.

DEFINITIONS

This Report contains reference to material that is copyright Standards Australia. That content is reproduced with permission from SAI Global under copyright Licence 0805-c037.

Timber Pest Attack means Timber Pest Activity and/or Timber Pest Damage.

Timber Pest Activity means telltale signs associated with 'active' (live) and/or 'inactive' (absence of live) Timber Pests at the time of inspection.

Timber Pest Damage means noticeable impairments to the integrity of timber and other susceptible materials resulting from attack by Timber Pests.

Conditions Conducive to Timber Pest Attack means noticeable building deficiencies or environmental factors that may contribute to the presence of Timber Pests.

Readily Accessible Areas means areas which can be easily and safely inspected without injury to person or property, are up to 3.6 metres above ground or floor levels or accessible from a 3.6 metre ladder, in roof spaces where the minimum area of accessibility is not less than 600 mm high by 600 mm wide and subfloor spaces where the minimum area of accessibility is not less than 400 mm high by 600 mm wide, providing the spaces or areas permit entry. The term 'readily accessible' also includes:

- (a) accessible subfloor areas on a sloping site where the minimum clearance is not less than 150 mm high, provided that the areas is not more than 2 metres from a point with conforming clearance (i.e. 400 mm high by 600 mm wide); and
- (b) areas at the eaves of accessible roof spaces, that are within the consultant's unobstructed line of sight and within arm's length from a point with conforming clearance (i.e. 600 mm high by 600 mm wide).

Client means the person or persons, for whom the Timber Pest Detection Report is to be carried out or their Principal. (i.e. the person or persons for whom the report is being obtained.)

Timber Pest Detection Consultant means a person who meets the minimum recommended competency standard set out in Australian Standard AS 4349.3.

Building and Site means the main building (or main buildings in the case of a building complex) and all timber structures (such as outbuildings, landscaping, retaining walls, fences, bridges, trees, tree stumps and timber embedded in soil) and the land within the property boundaries up to distance of 50 metres from the main building(s).

Timber Pests means one or more of the following wood destroying agents which attack timber in service and affect its structural properties:

- (a) *Chemical Delignification* - the breakdown of timber through chemical action.
- (b) *Fungal Decay* - the microbiological degradation of timber caused by soft rot fungi and decay fungi, but does not include mould, which is a type of fungus that does not structurally damage wood.
- (c) *Wood Borers* - wood destroying insects belonging to the order 'Coleoptera' which commonly attack seasoned timber.
- (d) *Termites* - wood destroying insects belonging to the order 'Isoptera' which commonly attack seasoned timber.

Tests means additional attention to the visual examination was given to those accessible areas which the consultant's experience has shown to be particularly susceptible to attack by Timber Pests. Instrument Testing of those areas and other visible accessible timbers/materials/areas showing evidence of attack was performed.

Instrument Testing means where appropriate the carrying out of Tests using the following techniques and instruments:

- (a) *electronic moisture detecting meter* - an instrument used for assessing the moisture content of building elements;
- (b) *Termatrac* - an instrument which uses microwave technology to sense movement within building elements
- (c) *probing* - a technique where timber and other materials/areas are penetrated with a sharp instrument (e.g. bradawl or pocket knife), but does not include probing of decorative timbers or finishes, or the drilling of timber and trees; and
- (c) *sounding* - a technique where timber is tapped with a solid object.

Note: Cancellation fee of \$44.00 applies if less than 24 hours notice received.
